

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-11 (previously canceled)

12. (Previously Amended) A scented calendar having a container of a fragrant oil attached to the calendar to permit replenishment of a scent element attached to the calendar, the scented calendar comprising an annual calendar formed by a plurality of sheets of paper each having an artwork image on one face and a monthly calendar image on an opposite face, wherein
5 the artwork image is oriented upside down with respect to the monthly calendar image on the opposite face so that flipping a face bearing a monthly calendar image upwardly about a horizontally disposed axis reveals an artwork image positioned above a next following monthly calendar image, both in an upright orientation, wherein each sheet defines an aperture adjacent a bottom edge of the calendar image and adjacent an upper edge of the artwork image to permit the
10 calendar to be mounted to a wall hook or nail,

said annual calendar further comprising a spine forming the horizontally disposed axis and including

a first sheet having a January artwork image on one side; and

a second sheet having a January calendar image on one side and a February artwork image on an
15 opposite side, said first sheet and said second sheet being connected via the spine so that the January artwork image faces the January calendar image when the calendar is in a January-closed position and the January artwork image is positioned above the January calendar image when the calendar is in a January open position;

wherein the scent element which releases scent corresponding to the January artwork image is

20 positioned between the January calendar image and the January artwork image when the calendar is in the January-open position,

the scent element being formed from blotting paper which is impregnated with a fragrant oil having an aroma which corresponds to the January image.

13. (Previously amended) A scented calendar as in claim 12 wherein the spine comprises a spine element attached to the sheets of paper by ring elements and the container is in the form of a vial which is positioned inside of the ring elements which connect the spine with the sheets of paper carrying the monthly calendar images, wherein the images are images of flowers.

14. (Previously amended) A scented calendar as in claim 12 further comprising a plastic wrapper encasing the scent element which can be removed by the user to release the scent, wherein the images are images of flowers.

Claim 15 (previously cancelled)

16. (Previously amended) A scented calendar

comprising an annual calendar formed by a plurality of sheets of paper each having an artwork image on one face and a monthly calendar image on an opposite face, wherein the artwork image is oriented upside down with respect to the monthly calendar image on the opposite face so that
5 flipping a face bearing a monthly calendar image upwardly about a horizontally disposed axis reveals an artwork image positioned above a next following monthly calendar image, both in an upright orientation, wherein each sheet defines an aperture adjacent a bottom edge of the calendar image and adjacent an upper edge of the artwork image to permit the calendar to be mounted to a wall hook or nail,

10 said annual calendar further comprising a spine forming the horizontally disposed axis and

including

a first sheet having a January artwork image on one side; and

15 a second sheet having a January calendar image on one side and a February artwork image on an opposite side, said first sheet and said second sheet being connected via the spine so that the January artwork image faces the January calendar image when the calendar is in a January-closed position and the January artwork image is positioned above the January calendar image when the calendar is in a January open position;

20 said scented calendar further comprising a plastic sheet which defines a plurality of pockets attached to the spine, wherein each pocket carries a removable scent element which carries a scent.

17. (Previously amended) A scented calendar as in claim 16 wherein wherein the artwork images comprise artwork of flowers and the scent carried by the calendar comprises the scent of flowers, and each removable scent element is configured to be attached to the calendar.

18. (Previously amended) A scented calendar as in claim 17 wherein

the spine comprises a spine element attached to the sheets of paper by ring elements, and each removable scent element is formed from a card of blotting paper having a generally rectangular shape and a slot extending alongside an edge surface of the card which is adjacent to the slot, a spear shaped protuberance being formed between the slot and the adjacent edge surface which is configured so as to be received by the ring elements attaching the spine to the sheets.

19. (Previously amended) A scented calendar as in claim 17 further comprising a plastic holder which defines a pocket for receiving a scent element and a fastener for attaching the plastic holder

to the calendar when the calendar is in a January-open position.

20. (Previously amended) A scented calendar as in claim 19 wherein the scent element is sized for being received by the pocket, wherein the artwork images comprise artwork of roses, and the scent carried by the calendar comprises the scent of roses.
